Dear Sir or Madam

Re: US Environment Agency Legislative Jurisdictions: Thesis J - 01

My name is Michael Clarke, an Environment research analyst writing an academic thesis commissioned by the Copus Agency regarding the enforcement administration's of the US Environment Agency.

In its preliminary stages the essay is solely concerned with the various Environmental Protection legislative jurisdictions your establishment oversees.

To this aim. I would be indebted if your could supply me with a hard copy inventory list, detailing the statutory Acts of the American Parliament which fall under the Environment Agency's organizational enforcement remits regarding the following pollution control areas. Thank you.

1. Indoor Air Quality Control.
2. Drinking water Quality pollution Control.
3. Asbestos Dust Fibre Control.
4. Environmental Health and Safety at Work.
5. Contaminated Land.

Simply because we are a small voluntary organisation trying to survive on limited funds and the cost of printing text material is so high. In addition, our current internet access is down at the moment due to our website's reconstruction.

Moreover, the information is important to us, and urgently needed. Therefore I would welcome a written response at your earliest possible convenience.

Yours sincerely

Mike Clarke
Research Analyst.
